MALAYSIA EDITION

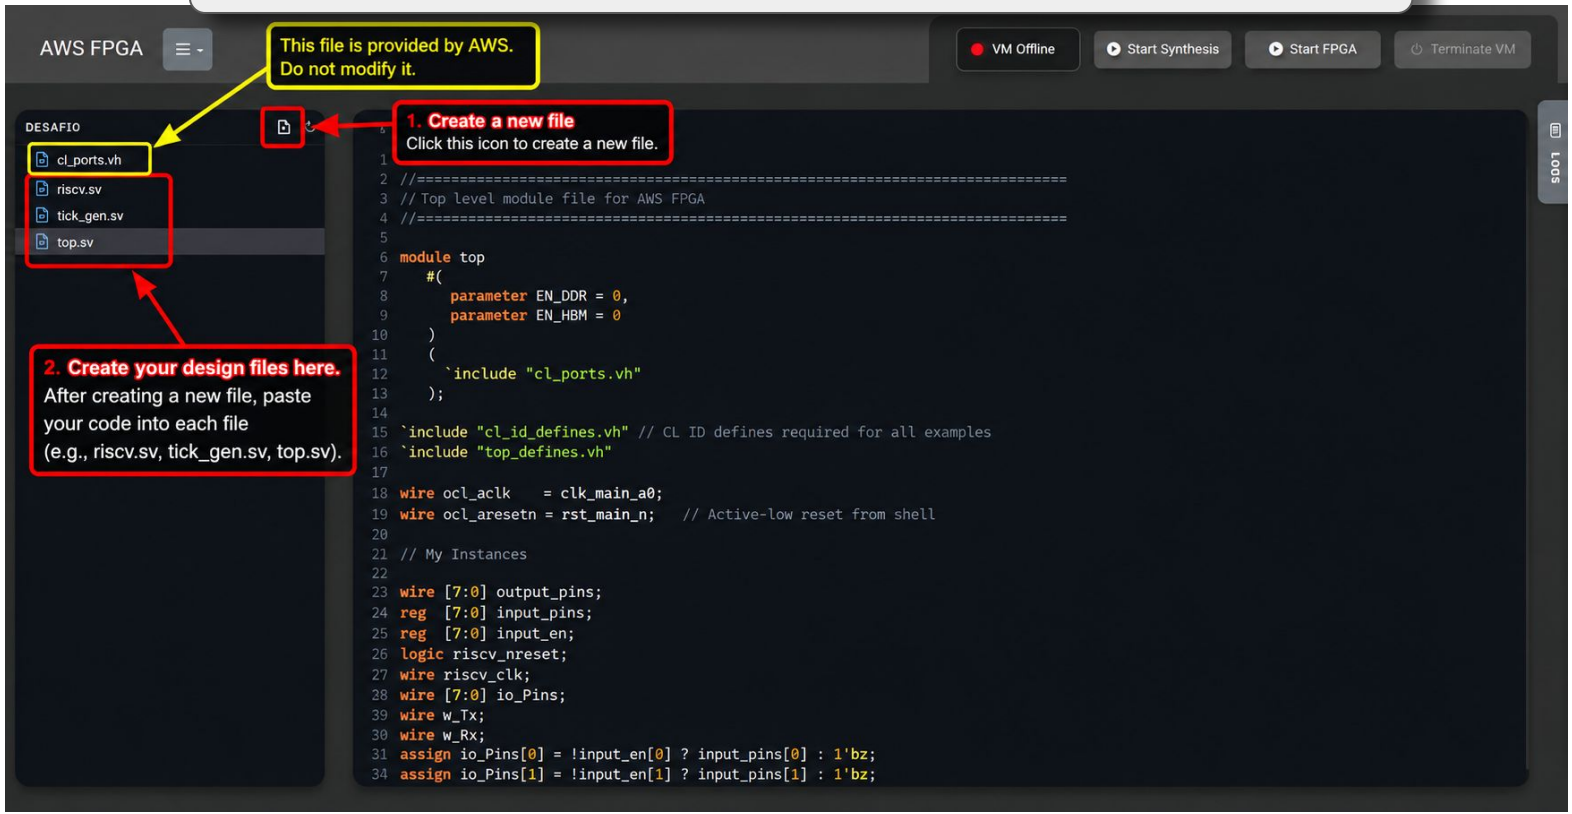

AWS FPGA WORKFLOW - BEGIN

Go to the AWS FPGA Area

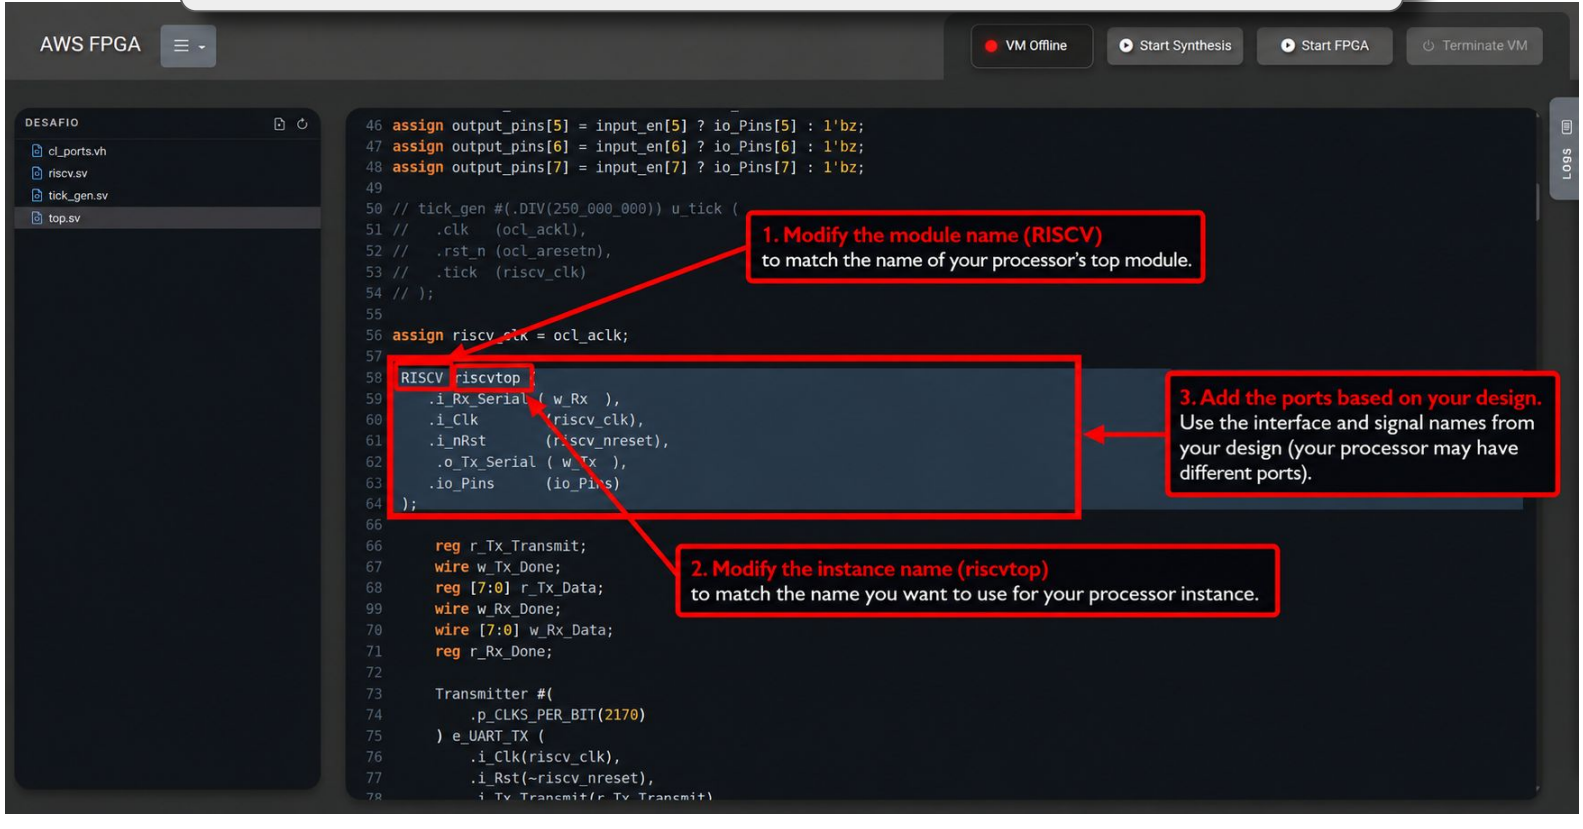

AWS FPGA WORKFLOW - CONFIGURE

Put Your Design Files

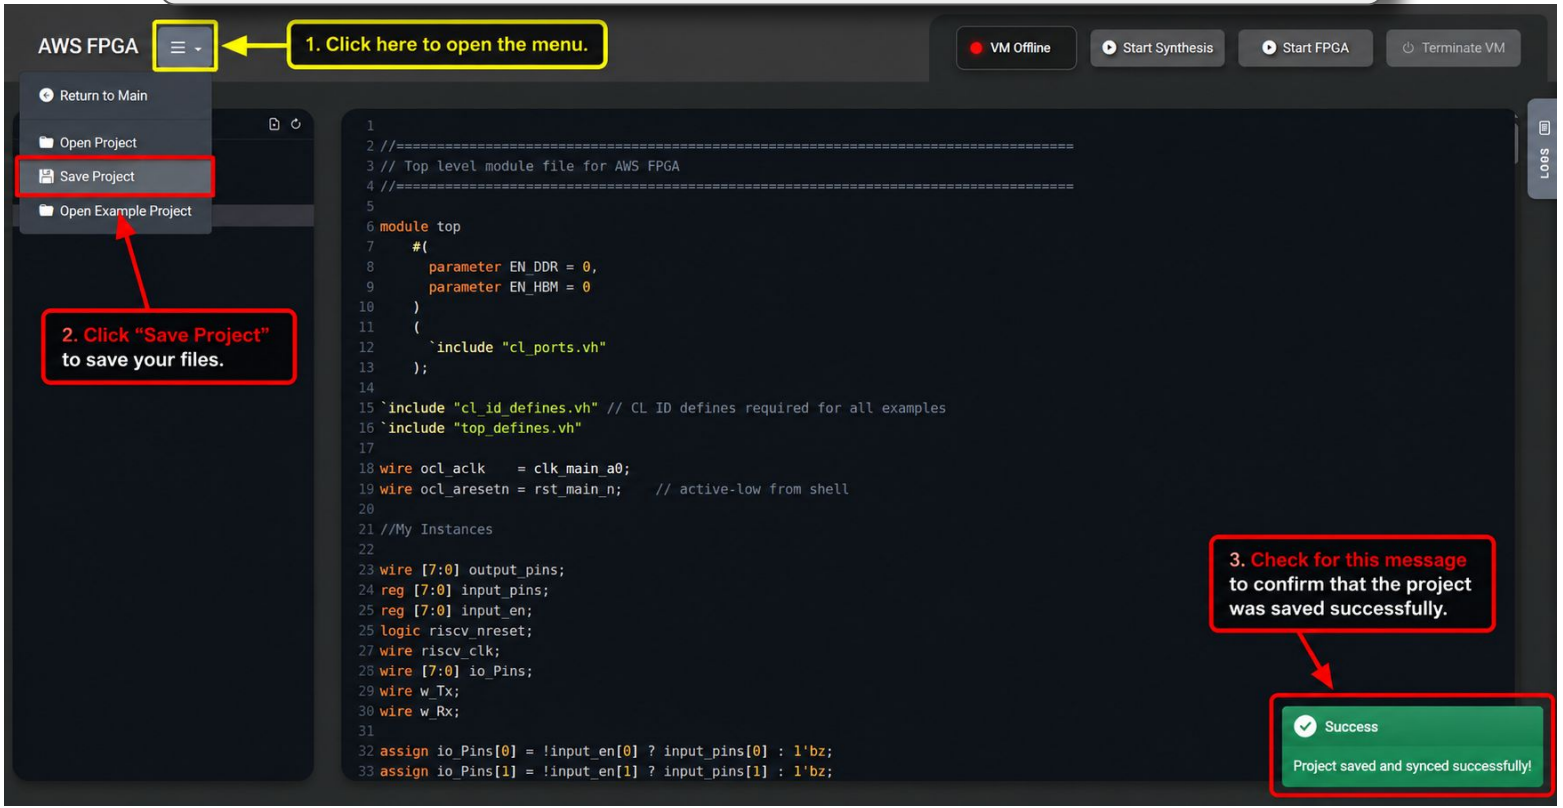

AWS FPGA WORKFLOW - CONFIGURE

Configure the Top Module

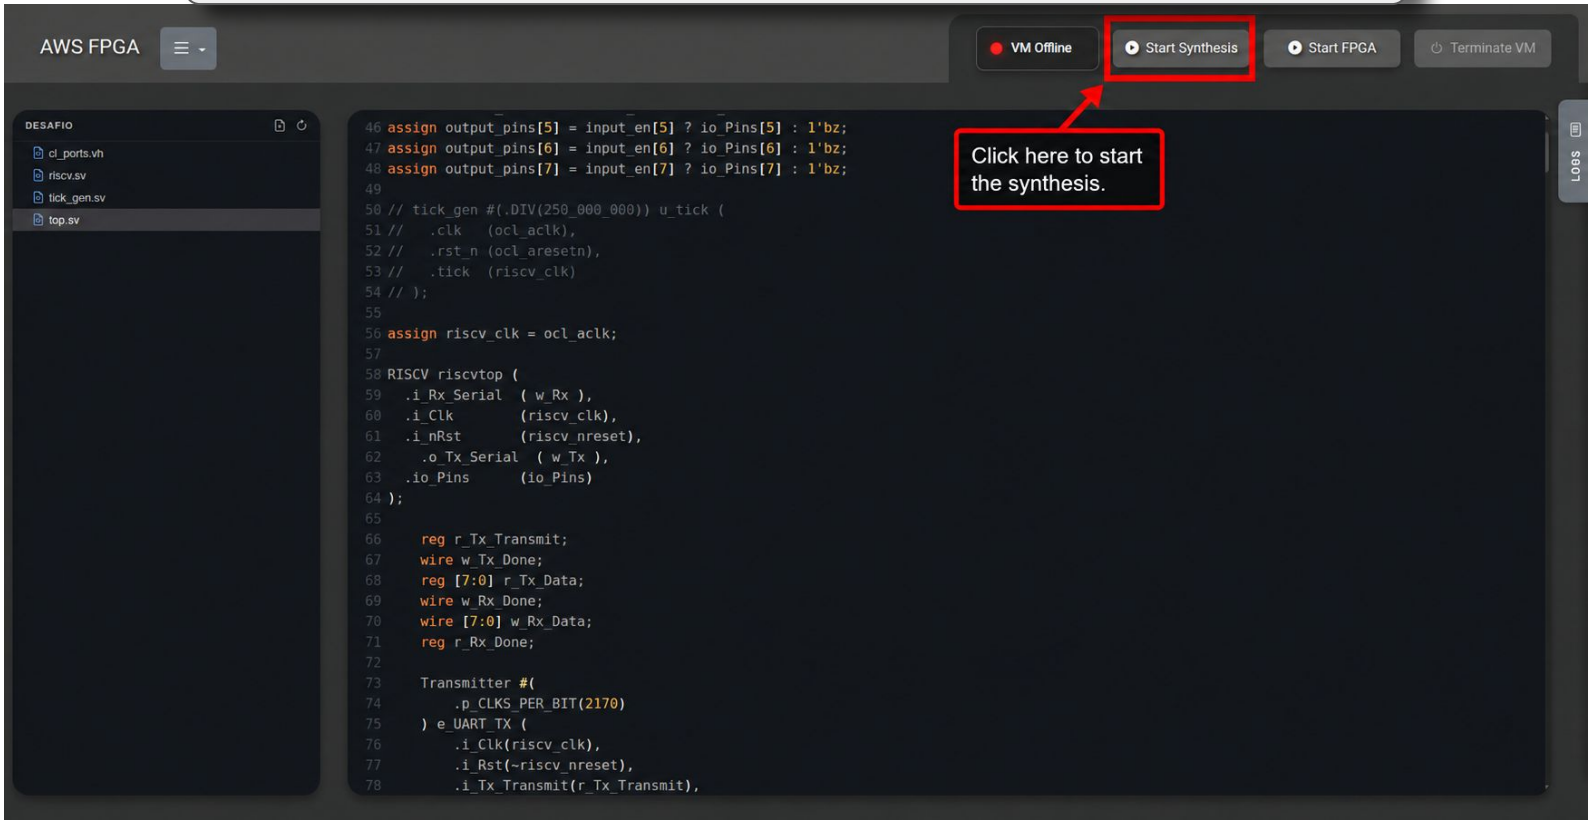

AWS FPGA WORKFLOW - CONFIGURE

Save Your Project

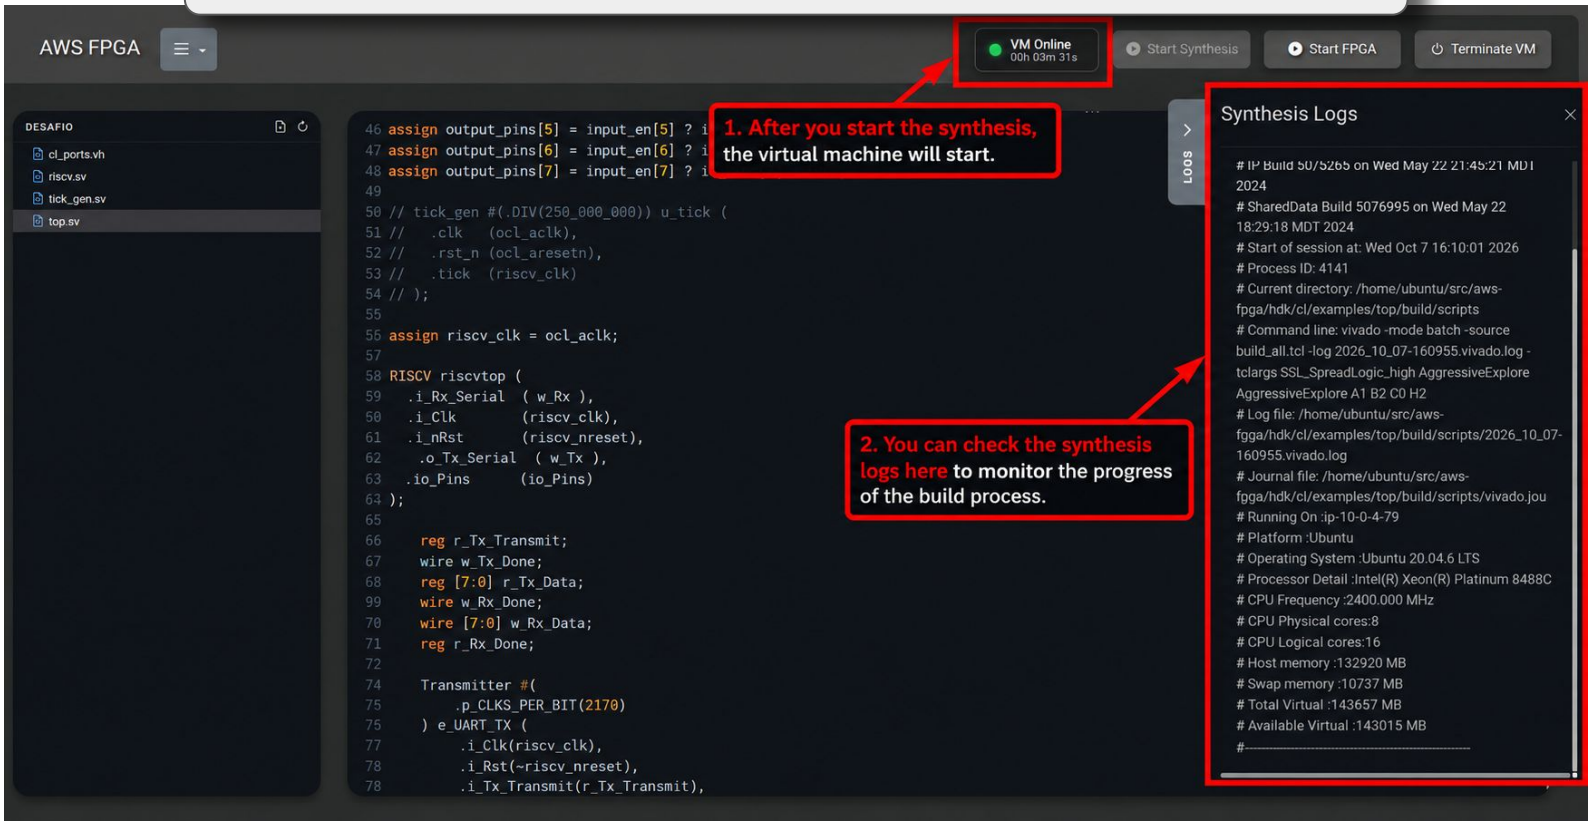

AWS FPGA WORKFLOW - SYNTHESIS

Start Synthesis

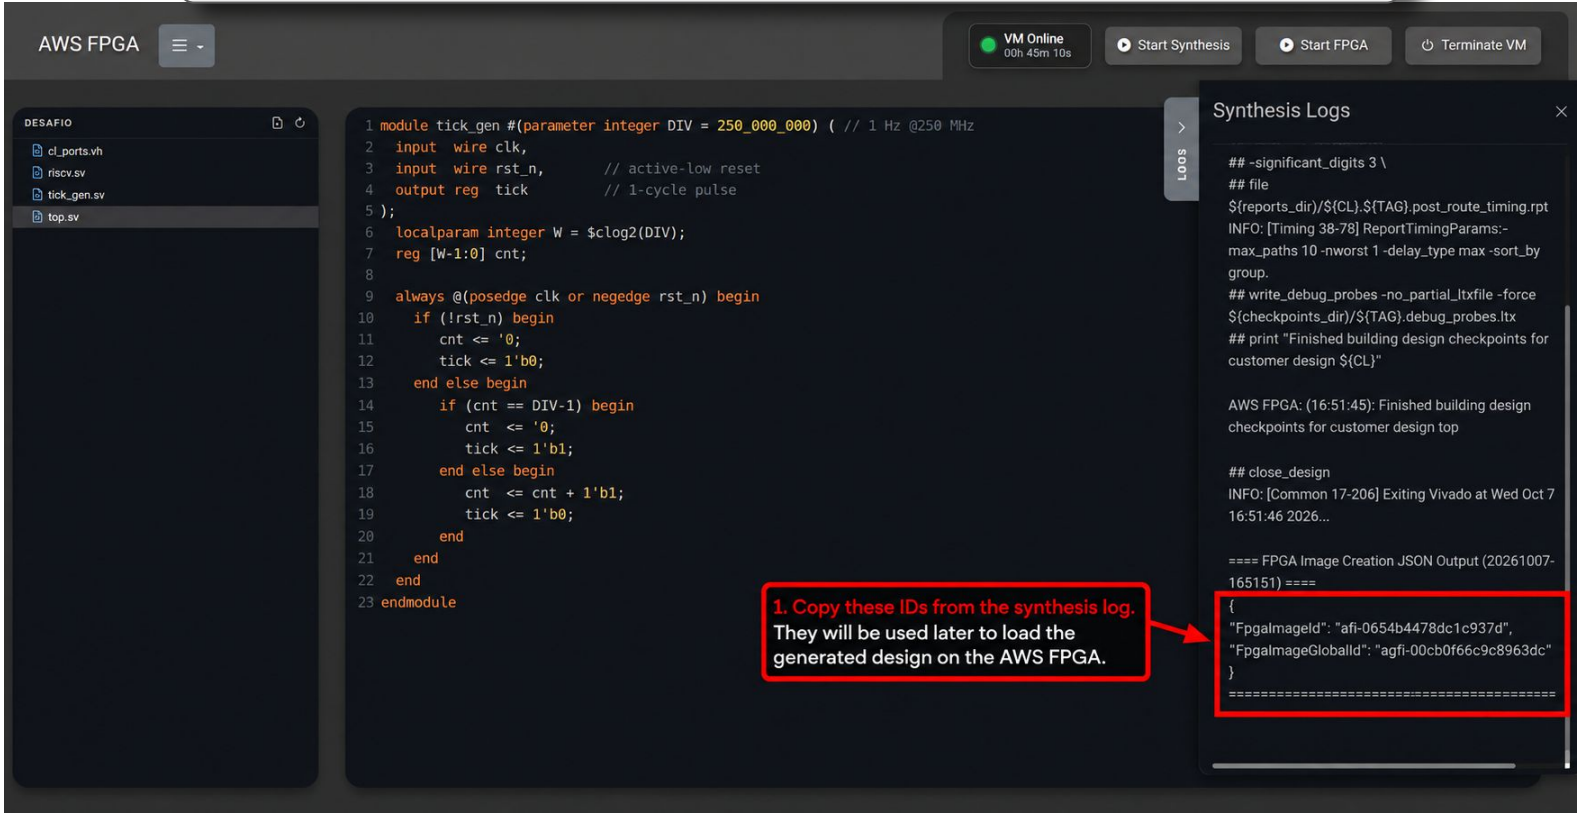

AWS FPGA WORKFLOW - SYNTHESIS

Monitor the Synthesis

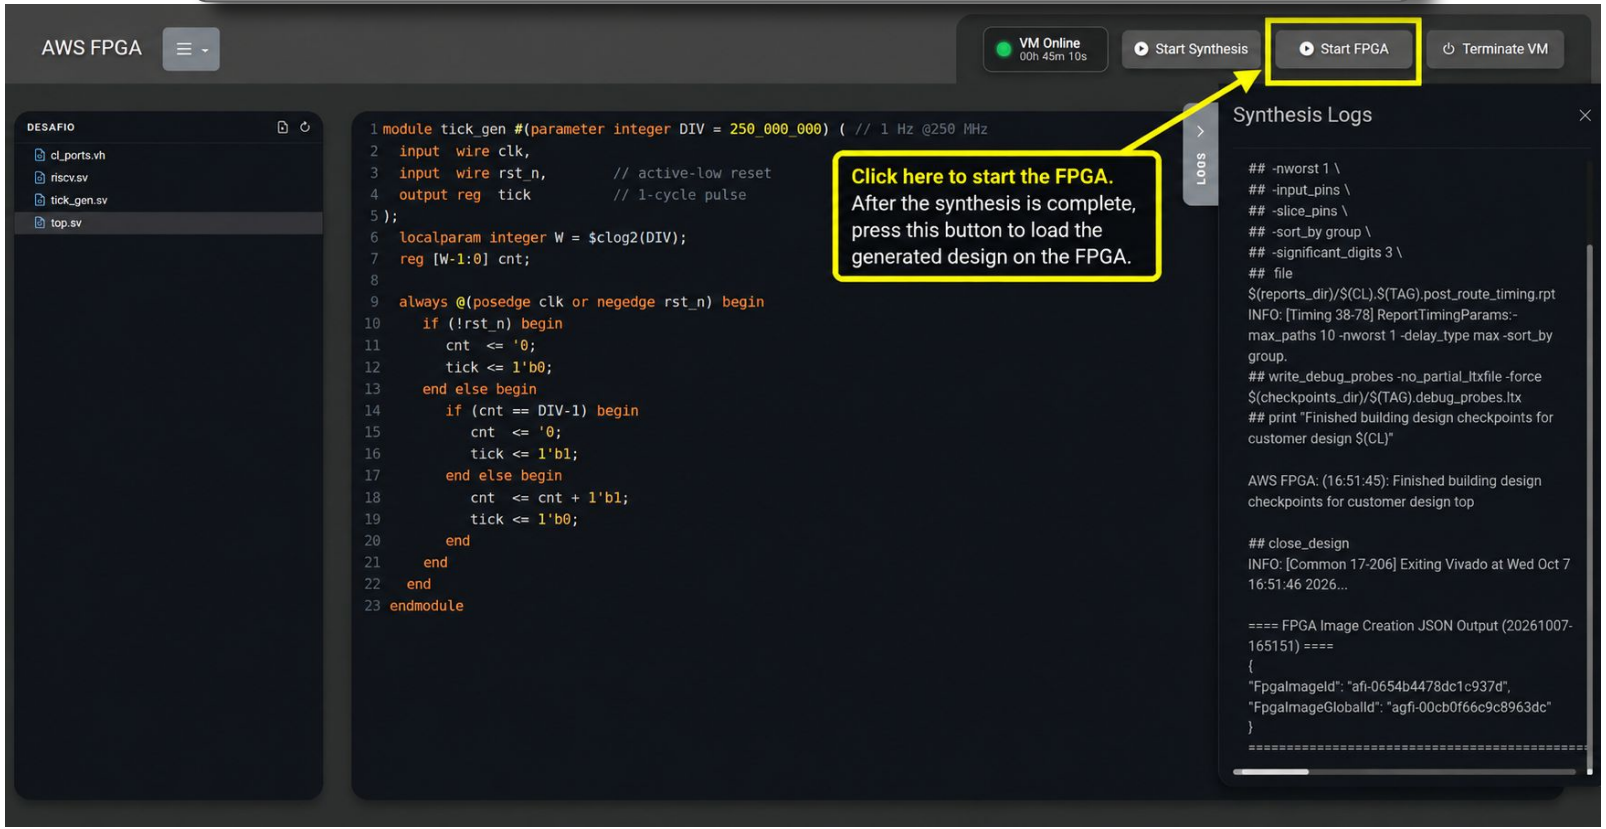

AWS FPGA WORKFLOW - SYNTHESIS

Synthesis Completed

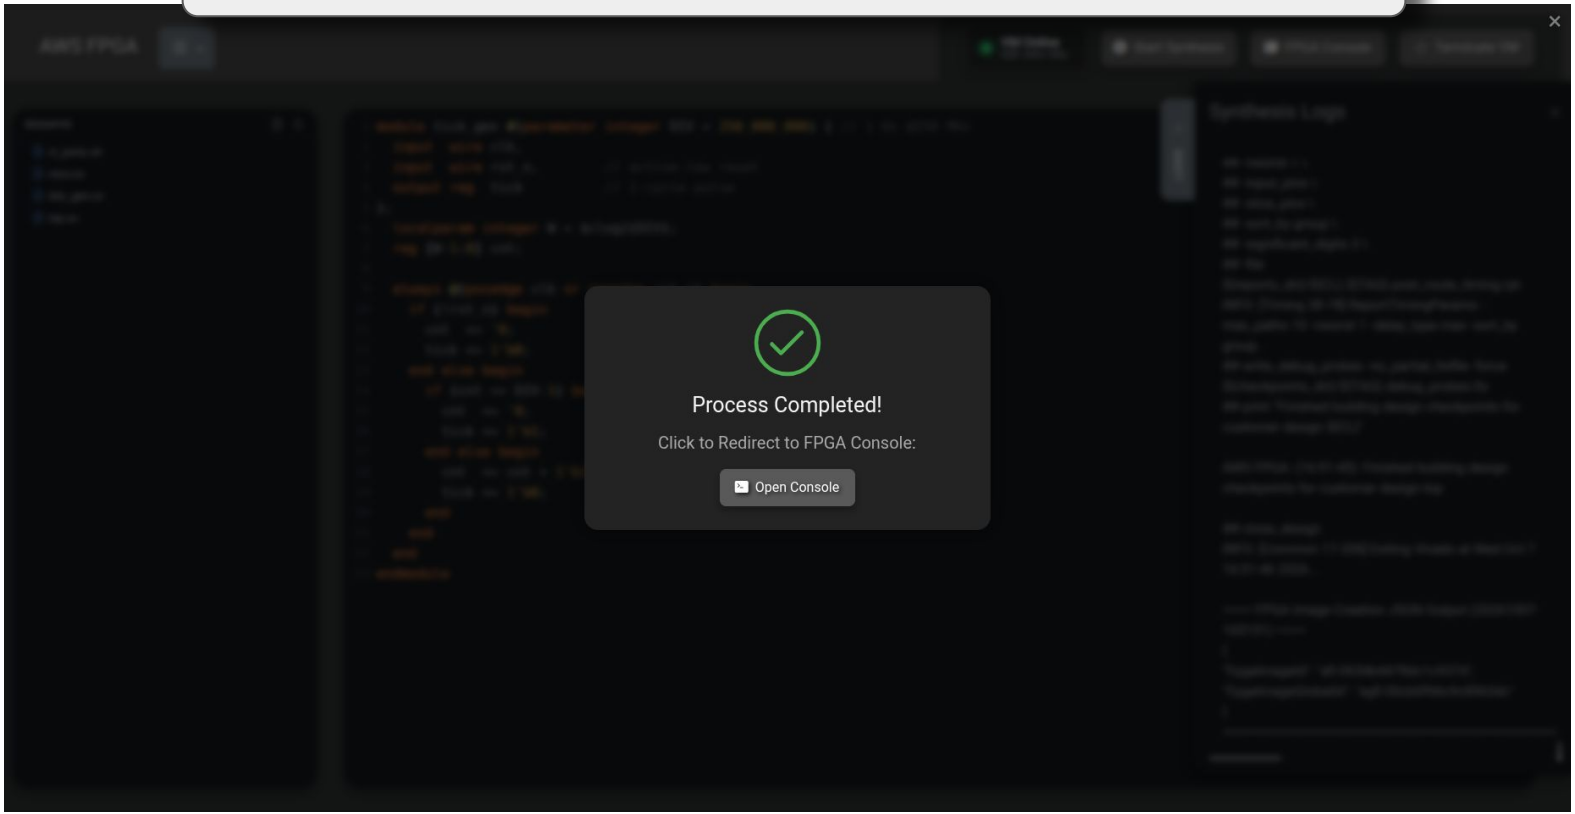

AWS FPGA WORKFLOW - FPGA

Start the FPGA

AWS FPGA WORKFLOW - FPGA

Open the FPGA Console

AWS FPGA WORKFLOW - FPGA CONFIGURE

Use Your AFI ID

```
root@ip-10-0-14-197:/home/ubuntu/aws-fpga/sdk/userspace# aws ec2 describe-fpga-images --fpga-image-ids afi-0d7981b6254415a00 --region us-east-1
{
    "FpgaImages": [
        {
            "FpgaImageId": "afi-0d7981b6254415a00",
            "FpgaImageGlobalId": "agfi-0218bbf1cb21694bb",
            "Name": "top",
            "Description": "Custom Logic",
            "State": {
                "Code": "pending"
            },
            "CreateTime": "2026-10-08T11:25:48.000Z",
            "UpdateTime": "2026-10-08T11:25:48.000Z",
            "OwnerId": "539285468417",
            "Tags": [],
            "Public": false,
            "DataRetentionSupport": false
        }
    ]
}
```

Your AFI ID
Replace with your AFI ID.

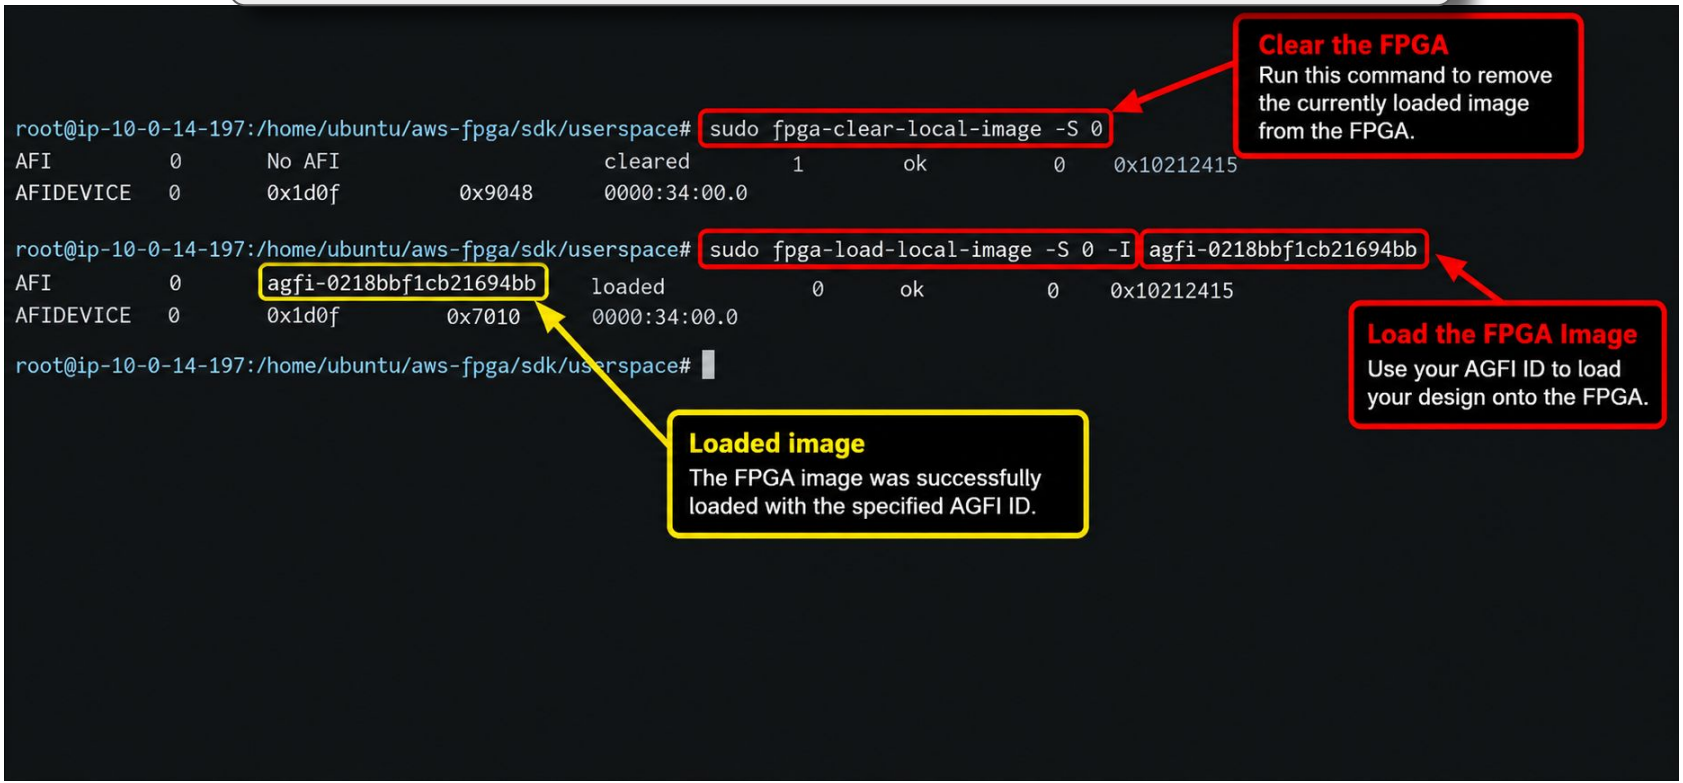

Image status
The FPGA image is still being prepared (pending). Wait until it becomes available.

```
root@ip-10-0-14-197:/home/ubuntu/aws-fpga/sdk/userspace# aws ec2 describe-fpga-images --fpga-image-ids afi-0d7981b6254415a00 --region us-east-1
{
    "FpgaImages": [
        {
            "FpgaImageId": "afi-0d7981b6254415a00",
            "FpgaImageGlobalId": "agfi-0218bbf1cb21694bb",
            "Name": "top",
            "Description": "Custom Logic",
            "ShellVersion": "0x10212415",
            "PciId": {
                "DeviceId": "0xf010",
                "VendorId": "0x10df",
                "SubsystemId": "0x1d51",
                "SubsystemVendorId": "0xfedc"
            },
            "State": {
                "Code": "available"
            },
            "CreateTime": "2026-10-08T11:25:48.000Z",
            "UpdateTime": "2026-10-08T11:39:27.000Z",
            "OwnerId": "539285468417",
            "Tags": [],
            "Public": false,
            "DataRetentionSupport": false
        }
    ]
}
```

Image status
The FPGA image is ready to use (available). You can now load it to the FPGA.

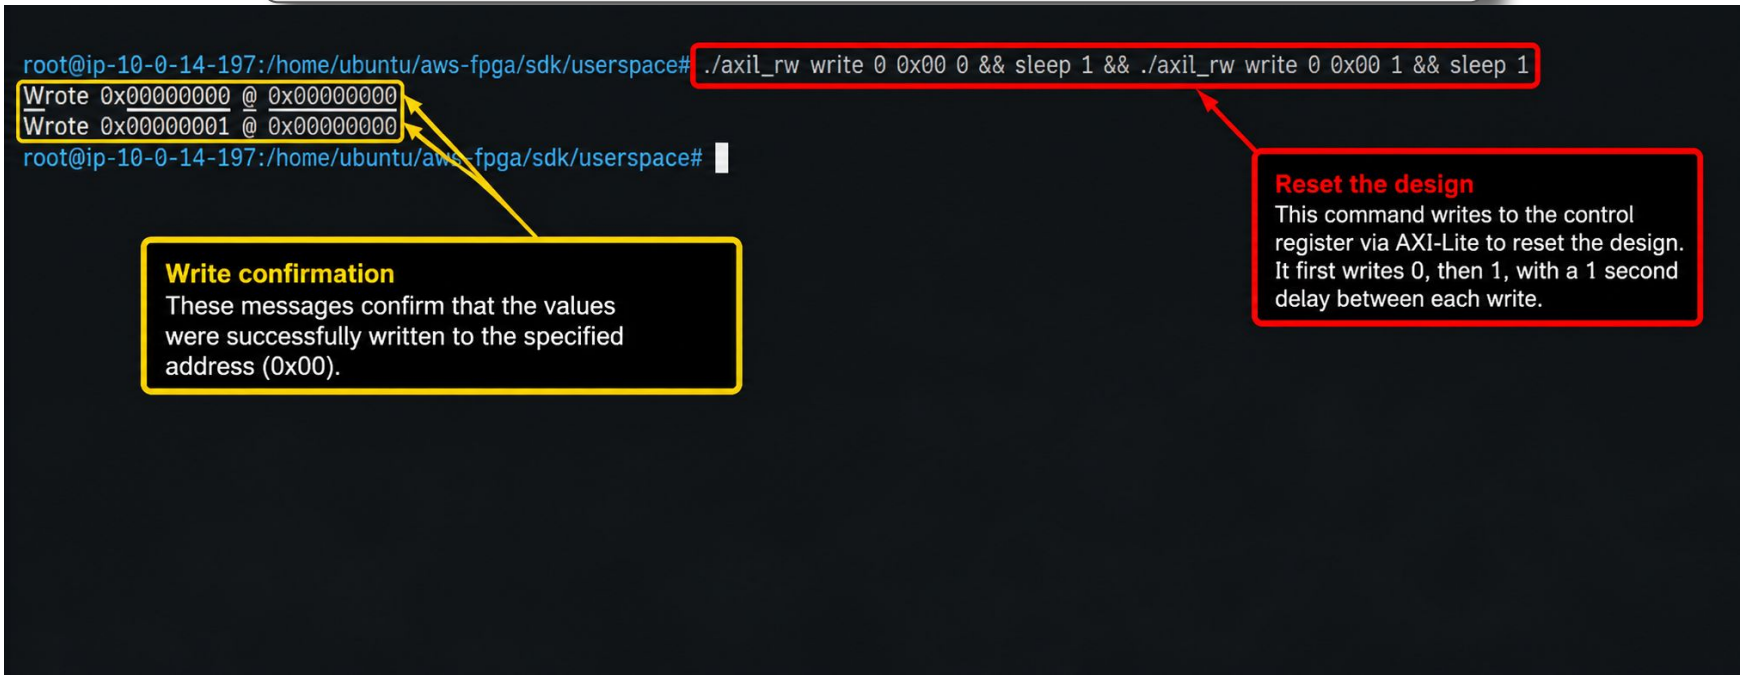

AWS FPGA WORKFLOW - FPGA CONFIGURE

Clean And Load Your AGFI ID Image

AWS FPGA WORKFLOW - EMULATOR

Do a Manual Reset

AWS FPGA WORKFLOW - EMULATOR

RUN YOUR EMULATOR EXAMPLE

ChampionChip
eXperience

END
